01115136283

Giza , Hawamdia

Education

B.Sc in Computer Science and Statistics at Helwan University

December 2021 - Present

Grade: 3.561

Experience

Full-Stack Web Development Trainee at Information Technology Institute (ITI), Remote

July 2024 - August 2024

- E-commerce Development: Built a multi-page e-commerce site with Django, PostgreSQL, and Bootstrap. Designed and implemented backend models, forms, and admin interfaces for efficient product and inventory management.
- Backend Implementation: Applied CRUD operations, user registration, and session-based authentication. Implemented features including cart system, checkout process, and user authentication.
- Team Collaboration: Collaborated with a development team using Git and GitHub for version control, code reviews, and agile development practices.
- Tech Stack: Django, PostgreSQL, Bootstrap, Git, GitHub

Data Analysis and Python Trainee at Central Agency for Public Mobilization and Statistics (CAPMAS), Cairo, Egypt

June 2024 - July 2024

- Statistical Analysis: Worked with real-world datasets to perform statistical analysis and generate insights. Completed a comprehensive project focused on analyzing socio-economic indicators in Egypt.
- Data Processing: Performed data cleaning, manipulation, and basic statistical modeling using Pandas and Matplotlib. Gained practical experience in data visualization and interpretation of complex datasets
- Tech Stack: Python, Pandas, Matplotlib

Skills

Proficient: Python, Django, Django REST Framework, PostgreSQL, Git, GitHub

Comfortable: JavaScript, HTML, CSS, MongoDB, Redis, Docker, AWS, Pandas, Matplotlib

Projects

Shipment Management System : • [↗](#)

Built a web-based shipment tracking system using Django REST Framework with interactive maps, reverse geocoding, automatic distance & pricing calculation, JWT authentication, and email notifications. Tech: Django , PostgreSQL, Bootstrap , external mapping APIs.

Product Rater API • [↗](#)

Developed a RESTful API for product ratings and reviews with CRUD operations and rating aggregation using Django REST Framework.

Markdown Note Taking API • [↗](#)

A Django-based API for creating, managing, and checking grammar in Markdown notes , Save notes with a title and markdown content , Get note details with the markdown content rendered as HTML , Check the grammar of any text using LanguageTool (configured to use a public remote server).

E-commerce Platform : • [↗](#)

Created a full-featured e-commerce platform with product listings, cart, checkout, authentication, sentiment analysis, recommendation engine, and chatbots. Used SQLite for development and PostgreSQL for production.
